Crime Analysis

A set of systematic, analytical processes directed at providing timely and pertinent information relative to crime patterns and trend correlations to assist the operational and administrative personnel in planning the deployment of resources for the prevention and suppression of criminal activities, aiding the investigative process, and increasing apprehensions and the clearance of cases. Within this context, Crime Analysis supports a number of department functions including patrol deployment, special operations, and tactical units, investigations, planning and research, crime prevention, and administrative services (budgeting and program planning). --Steven Gottlieb et al., 1994, "Crime Analysis: From First Report to Final Arrest."

TO: Office of the Chief of Police

FROM: Det. Sgt. Kurt Fasulo #63

SUBJECT: Crime Analysis Report September 2020

*During the month of September 2020, the Guilford Police Department had the following **Part 1** and selected **Part 2** Crimes reported: Reference Appendix A for further information. This information was compiled via the NEXGEN system utilizing a query of all Part 1 Crimes and select Part 2 crimes from the computer database. A full review of each queried case file report was completed.*

The Guilford Police Department investigated 705 cases for the month of September. This is a thirty-six percent (36%) decrease in calls from September 2019 (1109).

Burglary

None reported. The number of burglaries decreased when compared to September 2019 (2).

Criminal Mischief

There were three (3) criminal mischief cases for the month of September. Two of the three cases involved damage to public property. There were no arrests made for criminal mischief in the month of September. The remaining case involved damage to private property.

All three of the incidents reflect the time at which the complaint was received and not the time at which the crime was committed. These were reported after the damage was observed and the exact time and date of the occurrences is unknown. No trend nor pattern was identified to warrant the development of a response plan.

The number of criminal mischief cases decreased when compared with September 2019 (8).

Reference Appendix B for a graphic representation.

Larceny

There were eighteen (18) larceny cases reported during the month of September. One (1) of the cases was solved and was mediated without arrest.

The larceny types are as follows: One (1) shoplifting, six (6) thefts from motor vehicle, one (1) theft of mail, one (1) theft from residence, and nine (9) general larceny. For one case of theft from motor vehicle there were numerous complaints received and documented under one case number. Thus, while the statistics will show only one instance of theft from motor vehicle, there were numerous instances at various locations during the overnight hours.

For fourteen (14) of these larceny cases the exact date and time that the larceny occurred has not been determined. Thus, the date and time shown in the related graph reflects only that of the date/time reported. A separate graph has been provided which depicts day and time the offense was completed, if known. Nearly half of those cases in which the exact time of the offense was unknown included information from the victim suspected that the theft occurred during the overnight hours. However, the information obtained was insufficient for projecting a time of offense.

The number of larceny cases increased from September 2019 (7).

The fraud cases for the month of September are as follows: three (3) General Fraud, three (3) Fraud via Internet, two (2) Fraud with Credit Card, one (1) Fraud – Flim Flam, and one (1) Fraud – Identity Theft. These fraud incidents mostly were attempts to defraud victims of funds. In some cases, the involved complainants were reimbursed or did not experience any loss. In total there was **\$8,600.00** in losses experienced from these incidents. Additionally, there was \$303,140 unsuccessfully stolen via fraud during this period.

Reference Appendix D for a graphic representation.

Robbery

None reported. This remained consistent with September 2019 (0).

Larceny of MV

There was one (1) stolen motor vehicle cases for the month of September. This is an increase when compared with September of 2019 (0).

Aggravated Assault/Simple Assault

None reported. This remained consistent with September of 2019 (0).

Arson:

None reported. This remained consistent with September of 2019 (0).

Sexual Assault/ Sex Offense:

None reported. This is a decrease from September 2019 (1).

Homicide

None reported. This remained consistent with September 2019 (0).

Criminal Activity Information and Intelligence

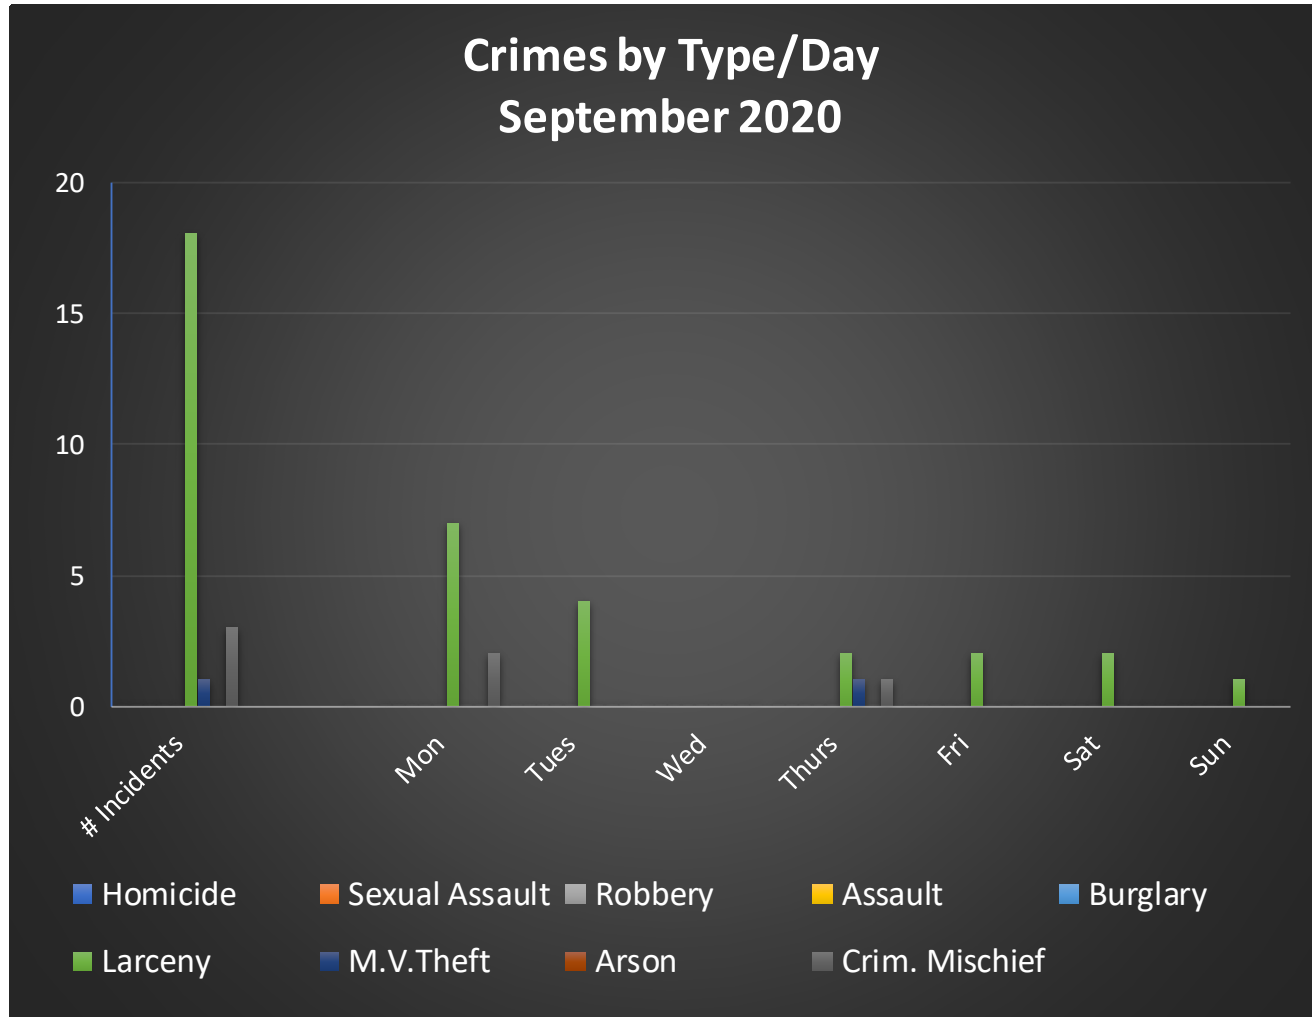

CTIC provided LEO intelligence during this month. The New England State Police Information Network also served as a source of intelligence as did the Law Enforcement Information Exchange (LInX). Guilford Police also monitors Crimedex Law Enforcement Portal for updated information on financial crime trends. Crime intelligence sharing is also monitored through the New Haven Police Department's SLACK channel as well as internally utilizing the Guilford PD SLACK channel. The Detective Unit continues to monitor social media and the anonymous tip line for gathering and evaluating criminal intelligence.

Intelligence meetings were not held during the month of September for the Middlesex County Detective Association and Shoreline Detectives due to COVID – 19 precautions. New Haven MDT meetings were held virtually in regard to ongoing criminal activity in all attending agencies' jurisdictions.

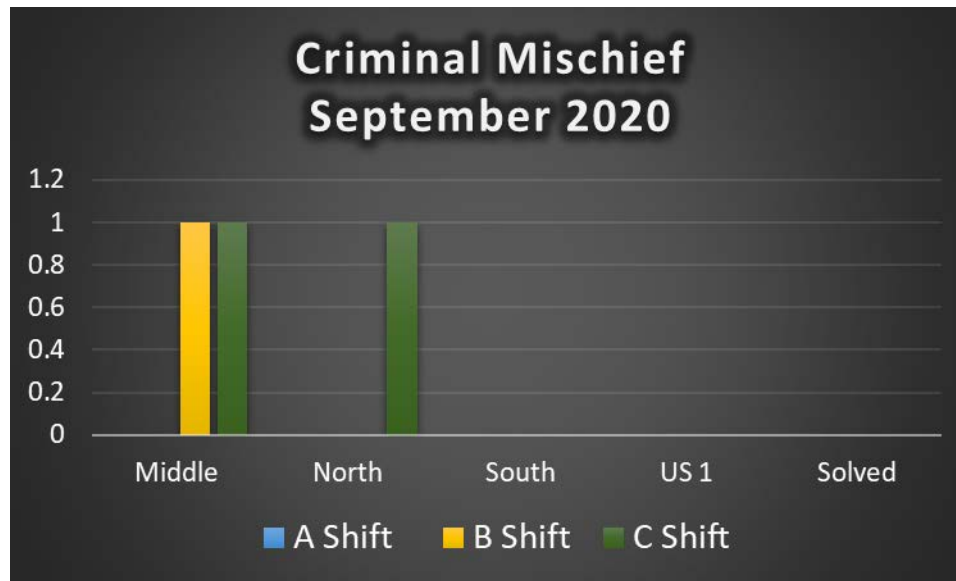

Respectfully submitted,

Det. Sgt. Kurt Fasulo
